Department of Physics, University of Durham, United Kingdom

Title: Superfluorescence

--past, recent and the latest

Abstract: The concept of superfluorescence is introduced, its observations are briefly reviewed. The recent progress on superfluorescence from luminescent polymers will be discussed, along with our latest data from femtosecond fluorescence upconversion experiments.

Brief CV of Dr. DeChang Dai:

PhD 2000, State key Lab of ultrafast laser spectroscopy, ZHongShan University, Guangzhou , with Prof. Zhou JianYing

then as post doc in Germany, The Netherlands and Hong Kong University

Moved to Durham in 2004.
